## Noor Leather (Pvt.) Ltd.

Working from raw to finish so taking care at every stage of the leather production.

Versatile tannery to produce both soft and hard leathers, light and heavy leathers for garment and handbag usage.

We at Noor Leather, are the fourth generation in leather business, starting about a century ago when raw leather used to be sold, to today, when our family business produces high quality leather and leather garments for brand name fashion houses around the globe. In combination with our experience and the skilled manpower, our tannery concentrates on producing fine leathers made out of lamb and goatskins of European, NZ, MiddleEastern, African and domestic origins, and are used in the production of fashion garments, handbags and footwear. The production facilities have been enhanced by setting up a new tannery in the year 2011, with well equipped machinery to increase our production capacity to over 1 million sf / month.

The Leather garments unit produces for high quality brand names in European, Japanese and North American markets, where the capacity has also been recently enhanced to over 150,000 garments per annum.

Product: Backdrop, standees, Project material such as brochures, leaflet and studies

Company Profile: WWF-Pakistan was established in 1970 and was instituted to address local environmental issues in the country. Pakistan faces numerous economic, environmental and social challenges that are exacerbated by a rapidly increasing population. Urban challenges - include pollution and overcrowding, whereas rural communities face vulnerability to extreme weather events and issues stemming from their dependence on natural resources for their daily needs and livelihoods. WWF-Pakistan works to address these challenges through its mission - to stop the degradation of the planet's natural environment and to build a future where people and nature can thrive, by: 1. Conserving the world's biological diversity, 2. Ensuring that the use of renewable natural resources is sustainable 3. Promoting the reduction of pollution and wasteful consumption.

WWF-Pakistan is currently working in eighteen different landscape areas of land or water that share similar or interrelated ecological processes and characteristics.

Conservation here involves joining these areas together to maintain and improve ecological integrity for the benefit of both people and nature. Conservation areas: Freshwater, Forests, Food and markets, Wildlife, Oceans, Climate and energy.
